Hugh –

I have reviewed the backfill materials information submitted for the Upper Level SWMUs and G2 AOC excavations. This material, and the intended backfill approach as detailed in your attached document, is acceptable. Backfill of the excavations may commence once the storm water discharge from the excavation(s) is completed.

Please submit the topsoil chemical information at least a week prior to planned placement.

Sincerely,

Lynn M. Winterberger

Subject: Documentation for NYSDEC Approval of SPRU Backfill Materials

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Lynn,

Please find attached required information on the backfill materials that DOE intends to use in the H2 and G2 excavations. On-site soil for reuse was sampled for chemicals, per DER-10, and the results are given in the attachment. Imported stone and gravel will come from permitted quarries and does not require chemical samples under DER-10. Note that last year we provided NYSDEC with non-required chemical data on the structural fill (non-soil) used in the G2 excavation. We are using structural fill from the same quarry for backfill of the excavations.

We did not include chemical information on the topsoil, as that material will not likely be placed until spring. We will submit that information to you at a later date.

We are close to being ready to backfill, and appreciate your review of this information. Please let me or Steve Feinberg know if you have any questions or comments.

Regards,
Hugh

SPRU SOURCES OF BACKFILL

This report describes the materials that will be used for backfilling the excavations at SPRU that were remediated under the RCRA Corrective Action Permit. Backfill is expected to be performed in October and November 2018. Placement of top soil and seeding will likely occur in Spring, 2019.

G2 Area of Concern (AOC-008)

The G2 excavation will be almost entirely backfilled with gravel (structural fill, also known as Item 4). Some amount of crusher run may be placed at the bottom of the excavation in wet areas in order to provide a base for compacting the structural fill.

Upper Level SWMUs

H2 Tank Farm (SWMU-031)
H2 Processing Facility (SWMU-030)
G2/H2 Tunnel (SWMU-057)
Fractionation Tanks 2 (SWMU-082)

Several sources of backfill will be used on the Upper Level SWMUs. These include:

1. Structural fill (gravel)
2. Stone (3" – 4")
3. Crusher run
4. Soil and backfill from site overburden

ITEM	ORIGIN	SOURCE
Structural fill (gravel)	Import	Warren Fane 42 Allen Road (Hemstreet Park) Schaghticoke, NY Mine Permit 40289 Or 449 State Route 40 Troy, NY Mine Permit 40283
Stone (3" – 4")	Import	R.J. Valente Gravel Inc 3348 NY-2 Cropseyville, NY 12052 Mine Permit 50507
Top Soil	Import	Warren Fane 42 Allen Road (Hemstreet Park) Schaghticoke, NY Mine Permit 40289 Or 449 State Route 40 Troy, NY Mine Permit 40283
Crusher Run	Import	R.J. Valente Gravel Inc

		3348 NY-2 Cropseyville, NY 12052 Mine Permit 40693 OR Callanan Industries(Pattersonville Plant) 7662, 401 NY-5S Amsterdam, NY 12010 Mine Permit 40004
Crusher Run	Re-use	SPRU site, re-used from site construction
Soil/backfill	Re-use	SPRU Site, re-used from clean SPRU-site layback excavated around the H2 Building

ITEM DETAILS

Structural Fill (gravel), also known as Item 4, will be obtained as virgin material from an off-site quarry with a NYSDEC Mined Land permit. This will come from the same supplier as used for the partial backfill of the G2 excavation in 2017. This will constitute greater than 80% of the total backfill in the G2 and H2 excavations.

Large washed stone will be obtained as virgin material from an off-site quarry with a NYSDEC Mined Land permit. The stone will be used to fill in a portion of the deep H2 excavation where substantial water has accumulated.

Top soil will be imported from an off-site supplier for use as the final layer in the backfill of both H2 and G2. The material will be tested in accordance with the DER-10 guidance for VOCs, SVOCs, metals, and PCBs/Pesticides.

Crusher run was brought into the site from an off-site quarry with a NYSDEC-permitted Mined Land permit for use in construction roads and lay-down areas. Some of the material may be used in the low wet spots in G2. The remainder of the re-usable crusher run will be placed as backfill in the H2 excavation.

During the remediation of the G2 AOC and Upper Level SWMUs it was necessary to excavate several hundred cubic yards of overburden to meet the safe layback slopes required under OSHA. Much of that material was expected to be free from contamination based on the known locations of spills and releases. This material was stockpiled and sampled in accordance with the DER-10 guidance. A summary table of the laboratory analytical results is provided.

SOIL REUSE LABORATORY ANALYTICAL RESULTS

The soil intended for reuse was sampled at the frequency defined in DER-10. The on-site sources are each less than 300 cubic yards. Therefore, each pile was sampled at a frequency of one VOC grab sample per 50 cubic yards, and one composite sample for SVOCs, Inorganics & PCBs/Pesticides.

The individual excavation sources are:

- About 300 cy from the northwest layback of the H2 excavation during removal of the slab, footer drain, and Hillside Sump drain line. (Series labeled "NH" and VOC sample labeled "H2NW")
- About 150 cy from east of G2 during installation of a new storm drain (Series labeled "NEG2")

All VOC samples reported non-detections for toluene and trichloroethylene (TCE), the two primary VOC contaminants of concern. The samples analyzed for VOCs are:

- SR-H2NW
- SRVOC-NEG2-01
- SRVOC-NEG2-02
- SRVOC-NEG2-03
- SRVOC-NH-01
- SRVOC-NH-02
- SRVOC-NH-03
- SRVOC-NH-04

The composites sampled for metals, SVOCs, and PCB/Pesticides are:

- SR-NEG2-03
- SR-NH-01

All results for VOCs and SVOCs were non-detections except for those listed in Table 1.

Table 1 VOC and SVOC Detections in Soil for Reuse

		SCO	NH-01	VOC-NH-03	VOC-NH-04	VOC-NEG2-01
2-Butanone	µg/kg	50		3.76 J		
Acetone	µg/kg	50		28	11.9	1.81 J
Carbon disulfide	µg/kg	2700		4.12 J	2.43 J	
Fluoranthene	µg/kg	100000	13 J			
Methylene chloride	µg/kg	50			2.59 J	
o-Xylene	µg/kg	#N/A		0.611 J		

All pesticide and PCB results were non-detections.

The results for metals are presented in Table 2. All results except are less than the corresponding SCO except for Iron. This is typical of the soils on the KAPL site.

Table 2 Metals Analyses in Soil for Reuse

	SCO	NEG2-03		NH-01	
Antimony	mg/kg	12	0 U	0.464	U
